

Jampilen HP502R

Homopolymer

JAMPILen Polypropylene

Description:

"Jampilen HP502R" is a high melt flow homopolymer for the production of low denier BCF, CF and staple fibers at medium to high spinning speeds. "Jampilen HP502R" offers high homogeneity, stable extrusion and excellent processability on both short and long spinning lines. This grade allows high stretch ratio and gives tough and resilient fibers.

"Jampilen HP502R" is widely used for the production of bulked continuous filament for carpet face yarns. Another major application is the production of high tenacity continuous filament for straps for backpacks, handles for big bags and safety belts. Continuous filament with medium tenacity is used for upholstery, sportswear and heavy duty clothing. "Jampilen HP502R" is also suitable for the production of low denier staple fibres for the thermobonding.

"Jampilen HP502R" is suitable for food contact.
